Work Injury Management

Our physicians recognize that work-related injuries are expensive, both in medical treatment and in lost time. The physicians incorporate best practice medicine to manage and effectively treat your employees.

Take a look at our objectives:

When it's simple, keep it simple

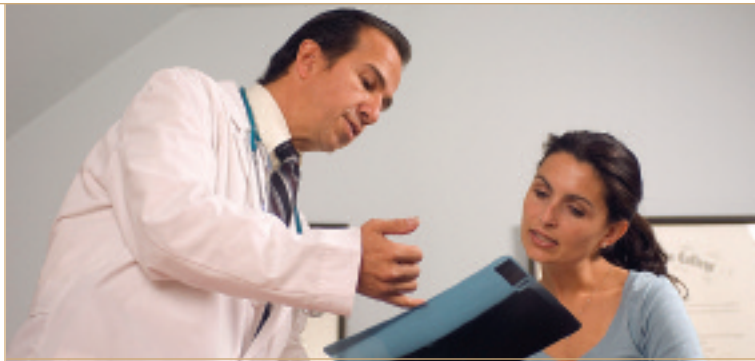

- ◆ Avoid medications, or use non-prescription strength medications
- ◆ Avoid lost time or restricted duty
- ◆ Educate the employee regarding expected outcomes
- ◆ Minimize appointments and / or missed work time

When it's not simple, keep it focused

- ◆ Avoid / minimize lost time
- ◆ Use appropriate restrictions
- ◆ Effectively communicate with the employer and patient
- ◆ Prudently use medications
- ◆ Seek timely referrals for diagnostics, specialists, or therapies.

When it's critical, benefit from the relationship with St. David's HealthCare

- ◆ Partnership with five Emergency Departments, all open 24/7
- ◆ Exceptional care, every day
- ◆ Follow-up care performed at Occupational Health Services
